

Judd Telemetry Solutions

The Basic Enclosure is an impact resistant, polycarbonate enclosure which offers protection from dust and moisture in accordance with IP67 (IEC529/DIN 40050/BS5490). It is moulded from homogeneous thermoplastic polycarbonate, is resistant to normal atmosphere corrosion and is resistant to most mineral and organic acids. Contact should be avoided, however, with organic solvents and strong alkalis. The material is self-extinguishing and does not release any toxic combustion products.

It is supplied complete with lid, gland plate, four cable glands and metal base plate, ready to take VersaNet modules. A depth of 108mm is available in an unexpanded enclosure. Enclosures may be bolted together or increased in depth using suitable accessories to accommodate larger numbers of modules.

The enclosure is supplied with a grey finish (RAL7035) and may be painted and machined with normal tools or ultrasonic welding apparatus. Cleaning should be performed with soap and water only.
