

VersaNet2 Radio Data Network

Digital Output Module

Part No. IRDN301J

Features

- Provides eight digital outputs per module, with up to sixteen modules per node.
- Used for control and alarm applications where relay outputs are required.

Brief Description

This module provides eight digital outputs to external devices in the form of changeover relays, fitted with arc suppression networks. Digital outputs change state based upon instructions received from the Communications Controller (IRDN200-xxx). These instructions may originate from a Digital Input at another node or via the Serial Data Highway for MODBUS applications. For exact configuration instructions please refer to the VersaNet2 User Manual (LIT0002).

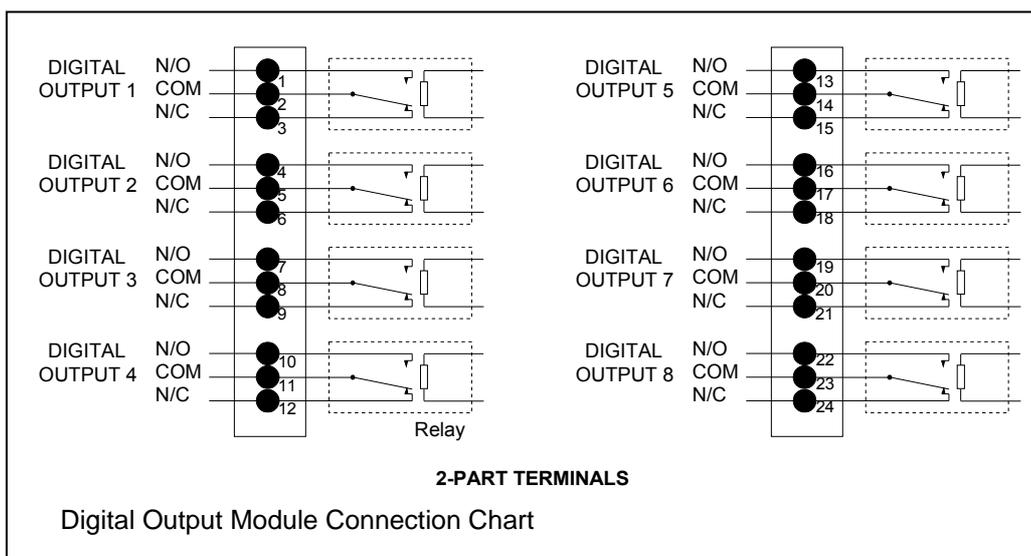

DIP Switch Settings

SW1 Settings				Address
1	2	3	4	
on	on	on	on	1
off	on	on	on	2
on	off	on	on	3
off	off	on	on	4
on	on	off	on	5
off	on	off	on	6
on	off	off	on	7
off	off	off	on	8
on	on	on	off	9
off	on	on	off	10
on	off	on	off	11
off	off	on	off	12
on	on	off	off	13
off	on	off	off	14
on	off	off	off	15
off	off	off	off	16

Switch 1 (4-Way DIP Switch) should be set to a unique address for each module of this type within a node. Switch settings should be performed without power connected.

Technical Specification

<p>Module Name Part Number No. of modules per Node Processor Internal Interface Relay Outputs Loading</p>	<p>Digital Output IRDN301J 16 max 80C31 T2-BUS Slave Peripheral 8 changeover, with arc suppression Minimum 1mA @ 1V DC Maximum 8A @ 240V AC 8A @ 120V AC 8A @ 30V DC</p>
<p>Output settling time Contact life expectancy (mechanical) Power Supply Current Consumption</p>	<p>20 ms per channel from receipt of T-Bus command 1 x 10⁷ 11 – 14V DC through T2-BUS Minimum 30 mA Typical 130 mA Maximum 250mA</p>
<p>Operating Temperature User connection Dimensions Weight</p>	<p>-10°C to +55°C 2 part screw terminals 144 x 167 x 32mm 0.3kg</p>

Rack Mounting

A rack mount version of the IRDN301 is available – Part code IRDN301R.
This card is fitted with a DIN 41612 connector to allow direct fitting into a 4U rack and connection to a back plane.
